Contents of the mail:

Kexp4.sql- file containing sql commands of experiment 4.

exp7.sql- file containing sql commands of experiment 7.

Here i am using MySQL 8.0.21.0 on Windows 10

We can run the the batch script from terminal using the following command

\$mysql -u (username) -p(password) < (~directory/batch.sql)

Then the batch will be executed.

- Here experiment 4 is to set various constraints for tables.
- I have already used some constraints in previous experiments like **PRIMARY KEY, NOT NULL, DEFAULT** etc.
- So in this experiment I am implementing constraints(**UNIQUE, AUTO_INCREMENT, CHECK, DEFAULT**) using **ALTER** command
- Experiment 7 is to create views.
- View **Billview, Contractview** are created

As these experiments are continuous execution of previous experiments is needed.
