exp10.sql- file containing sql commands of experiment 10.

exp11.sql- file containing sql commands of experiment 11

Here i am using MySQL 8.0.21.0 on Windows 10

We can run the the batch script from terminal using the following command

$mysql -u (username) -p(password) < (~/directory/batch.sql)

Then the batch will be executed.

- Here experiment 8 is to use clauses **ORDER BY, GROUP BY** and **HAVING**.
- Both asc and desc are used in **ORDER BY** and aggregate are used in **GROUP BY**.
- Experiment 9 is to use set operations, nested queries and join statements.
- Inner joins and Left outer joins are implemented also several set operations are also implemented.

As these experiments are continuous execution of previous experiments is needed.
